About This Game

There are dark places in the world inhabited by evil denizens. Places filled with danger and foreboding where no ordinary man would dare to journey. However, there are a few who are willing to risk death in the name of good, in the name of justice, in the name of.. valuable loot!

Hack, Slash, Loot is a single-player turn-based dungeon crawler. Take control of a lone hero and explore sprawling dungeons, fight dangerous monsters, and most importantly, plunder valuable treasures. With a new dungeon created every game you can be sure that no two playthroughs will ever be the same. Boasting easy to master controls you'll be adventuring in no time, but there is still enough depth to challenge the most hardened of adventurers.

Cool idea, but the execution..^^. Could be worst, I believe devs abandoned the project. Website (blog) is down... Here is extracted data out of the blog's cache:

. throw Mirror's Edge into the \u2665\u2665\u2665ing garbage dump, this is **the "dilbert experience" today this is as NSFW it gets. Waste of money.. This game is really cool. You should give it a try if you like old school 3D platformers like Mario64, Banjo, Crash Bandicoot or even games like Medieval. Or if you're a fan of gnomes and Faeries. It really feel like this game has a soul, its not derivative or trashware. And it got treasure chest with cool new toys in most levels.**

I really enjoyed my playthrough and plan to play again to save all the gnomes and catch all the Faeries.

I give it a 7/10

I thought this game looked cool, and after 30 minutes of playing, I returned it. There's potential here, but its controls aren't fantastic. To move, you swing your arms side to side to run, which feels fine. However, this causes basic sword combat to be extremely awkward as you are fighting the controls to swing while standing still. Not only that, but the game overall doesn't look fantastic, and the first fight is pretty awful. Just trying to keep track of the boss, or rather any enemy will your character constantly runs is just a nightmare, and overall the levels are just boring and messy. Wait for a price drop or more content or something, but \$20 is asking a lot for something with a cool idea, but pretty poor execution.. fix the damn slow motion \u2665\u2665\u2665\u2665\u2665\u2665t!. This game is really good if you know your way around. While the reviews are mixed, the game itself is great.

If you enjoy having to grind for a bit to earn your dream car with your sweet-earned bucks then you're welcome to give this game a try. It's not really worth the full price it's asking you for, you could wait for a sale but who am I to tell you this, it's completely up to you. I've personally gotten it during a Christmas sale when the price dropped down to 20 euros.

Over-all, the graphics are pretty neat, same goes for the physics, the game itself isn't meant to be a realistic simulator but it does aim somewhere towards that.

On the other hand, even if it's not aimed to be a realistic driving simulator, attempting to defeat races on the Ace difficulty could really give you a hard time.

One thing I'd like to add is that the game would be more enjoyable if we got more rewards when we're roaming with our Crews around the entire map. It would definitely motivate more people to form up a squad and drive around the city.. Underground Keeper

Is a First-Person Minesweeper

The difference from the Original minesweeper and this is that you need to blow up a set amount of mines with a limited amount of C4.

It doesn't bring anything new other than the view style and C4.

The levels are broken up in 3 difficulties; Easy, Normal and Hard, essentially.

You have to finish all 20 levels on Easy to unlock Normal, then 20 on Normal to unlock Hard with 60 levels in total.

The levels are not Dificult by any stretch, it feels more like Tutorial, Beginner, Normal for me and I found the original Minesweeper annoyingly difficult.

The game is very short and very monotone with no real soundtrack to speak of.

As the levels take no more than a minute or two with no real big variation in the puzzles,

I can't recommend this to you if you don't have a steady income,

unless you really like Minesweeper and its on a disscount, et least 50% . . . and you have NOTHING better to do.. How the hell i use the gold dlc thing?. Wait for the sale goes on sale.
